- HTML
- VANILLA CSS
- VANILLA JAVASCRIPT
- NEXTjs
- REACTjs
- MUI
- REACT REDUX
- CANVA
- TAILWIND CSS
- SUPABASE
- FIREBASEjs

PROFESSIONAL EXPERIENCE

NUPAT TECHNOLOGIES
Frontend developer(ReactJs)

Lagos, Nigeria
Oct. 2023 – Present

Company Website Enhancements – Nupat Technologies

Developed and enhanced key features of the company website to improve user interaction, lead generation, and customer support. Utilised React to create a dynamic and responsive user interface, ensuring seamless integration of third-party services.

Key Contributions:

- **User Information Modal:** Created a modal that collects user details (name, phone number, email) on their first visit, significantly increasing lead generation and converting website visitors into actionable leads.
- **WhatsApp Customer Support Integration:** Implemented a floating WhatsApp icon for real-time customer support, allowing users to initiate conversations with customer care. This feature streamlined customer service and improved response times.
- **Summer Code Camp Page:** Designed and launched a dedicated page showcasing tech courses, which became a key destination for prospective learners. Ensured an intuitive layout and responsive design to enhance user experience and drive course registrations.

Technologies:

- **Frontend:** React, Material-UI, Tailwind CSS
- **API:** WhatsApp API integration (for customer care)

Real Estate Web Application

Designed and developed a responsive web application to facilitate property transactions, including buying, selling, renting, and leasing. Utilised React for a dynamic user interface and Tailwind CSS for modern design aesthetics.

Key Features:

- **Dynamic Property Listings:** Real-time updates and filtering options for an optimised property search experience.
- **User Authentication:** Developed secure sign-in and registration features using Firebase for efficient user management..
- **Interactive Map Integration:** Integrated Google Maps API to provide users with an intuitive property location experience..

Technologies:

- **Frontend:** React, Tailwind CSS, Mui
- **Backend:** Firebase
- **APIs:** Google Maps API
- **GitHub:** <https://github.com/Haybesil/Affilestate>

School Management System

Contributed to the development of a school management system aimed at streamlining communication and administrative tasks for over 1,500 parents and 5,000 staff and students. Enhanced system efficiency through the implementation and improvement of various functionalities.

Key Contributions:

- **School Staff Dashboard:** Designed and developed a comprehensive dashboard that integrates real-time data from endpoints, providing a unified view of staff activities and performance.
 - **Staff Profile Management:** Implemented and enhanced functionalities for staff profile management, enabling detailed updates of staff information using endpoint data.
 - **School Creation and Editing:** Developed features for creating and editing school details, facilitating smooth administrative operations through API integrations.
 - **Admin Dashboard:** Created and optimised an admin dashboard to oversee various aspects of school management, integrating data from multiple endpoints to support administrative decision-making.
- **Github:** https://github.com/Lasmab-Projects/lasmab_admin

Huckster Store Web App

Contributed to the development of an e-commerce web application for Huckster Store, focusing on product listings, user authentication, and shopping cart functionality.

KEY CONTRIBUTIONS:

- **Product Listing Page:** Designed and implemented dynamic product displays featuring advanced filtering and search options to enhance user experience and product discoverability.
- **User Authentication:** Collaborated with the team to integrate secure login and registration systems using Firebase, ensuring a seamless user onboarding process.
- **Shopping Cart Functionality:** Assisted in developing a shopping cart and checkout process, contributing to an intuitive and efficient user experience.
-
- **GitHub:** <https://github.com/HuckstersEngineering/huckstersweb>

Cleaning Services Web Application

- **Overview:** Developed a responsive web application using React for a cleaning services business. The application enables users to explore available services and book appointments.
- **Technologies Used:** React, JavaScript, HTML5, CSS3, Material-UI.
- **Key Features:**
 - **Service Listings:** Created a user-friendly interface that displays various cleaning services with detailed descriptions and pricing.
 - **Appointment Booking:** Implemented a booking system allowing users to select services and schedule appointments.
 - **Responsive Design:** Ensured the web app is fully responsive, providing a seamless experience across desktop and mobile devices.
- **Role:** Front-end Developer – designed and developed the user interface, created components, and ensured responsive design.
- **GitHub:** <https://github.com/vendmartwallet/norriscole>

EDUCATION

OLABISI ONABANJO UNIVERSITY
Geophysics, (B.Sc)

Dec., 2011 – Oct., 2016

ADDITIONAL SKILLS

Hard skills

- Excel, Google Sheets,

PROFESSIONAL SKILLS

- Communication, Data and reporting, Problem solving, continuous learning, Open Mindedness, Team work, Creativity, Attention to details, Time management, Adaptability
